Resumo is an A.I. system that complements your existing HR software to help you make the best data-backed talent decisions.

Volume

- On an average, a job opening received 250 resumes and up to 88% of them are considered unqualified.

- Talent management team can spend up to 23 hours screening resumes for a single hire.

- Integrate into existing ATS (Application Tracking System).

- Screening resumes based on:
    - Minimum qualifications.
    - Preferred qualifications.

- Grading candidates based on minimum and preferred qualifications.

- Reduced time to hire.

- Higher quality of candidates.

- Improved candidate experience.

- Integrated Resumo into the Recruitee workflow

- Created an API to handle grading requests

- Used Spacy to score candidates by pattern matching with our ideal candidate

Full Stack Developer
